#### **APPLICANT'S REMARKS**

The Applicant thanks the Examiner Cooley for the courtesy and insight provided during the telephone interview of June 26, 2009 concerning the above identified application. The Supplemental Response is believed to incorporate the discussed claim amendments which will hopefully place this case in a condition for allowance absent the discovery of any additional pertinent prior art in an updated search.

In view of the foregoing, it is respectfully submitted that all of the raised rejections should be withdrawn and this application is now placed in a condition for allowance. Action to that end, in the form of an early Notice of Allowance, is courteously solicited by the Applicant at this time.

The Applicant respectfully requests that any outstanding objection(s) or requirement(s), as to the form of this application, be held in abeyance until allowable subject matter is indicated for this case.

In the event that there are any fee deficiencies or additional fees are payable, please charge the same or credit any overpayment to our Deposit Account (Account No. 04-0213).

[Signed by Michael Bujold]

4. The following is an Examiner's Statement of Reasons for Allowance:

The above amendment and remarks are a copy of a supplemental amendment filed 1 JUL 2009 filed by Applicant's Representative Michael Bujold. This amendment incorporates the revisions to the claims discussed during the interview of 30 JUN 2009 and ultimately approved by Applicant. The amendment is incorporated into this examiner's amendment to expedite processing of the application. Said revisions define over the prior art, particularly EP 1208905 and EP 1172138 since these references and the other prior art of record lack the glass-lined baffle and local connection wherein there is only a single local connection securing the respective baffle to an internal wall of a container, the local connection has a greatest dimension that is less than the length of the baffle, the baffle and the local connection only have rounded edges and angles, and the local connection is disposed between opposed ends of the respective baffle.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably **accompany** the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles E. Cooley in Art Unit 1797 whose telephone number is (571) 272-1139. The examiner can normally be reached on Mon-Fri.. The

Art Unit: 1797

fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
